the Government, are important for fixation of MSPs. The MSP thus fixed is a guaranteed minimum price which the farmers are offered by the designated Central and State agencies in the event market prices tend to fall below that level. However, if the market price is more than the MSP fixed by the Government, farmers are free to realize a higher price by selling their produce in the open market.

With the amendment of the Agricultural Produce Marketing Committee (APMC) Act for deregulation of the marketing system, the farmers now have more options to sell their produce to the prospective buyers. As a result of this and the emerging demand-supply gap, the prices in the market during the harvesting season also are ruling above MSP and benefiting the farmers.
